## EMPLOYERS USE IT TOO

Our clients have access to the same tests that many employers use to test candidates for specific knowledge. While your test results are 100% confidential and not shared with employers, having access to the same tests allows our clients to focus their preparation and confidently present their strengths to potential employers.

## HOW IT WORKS?

Each time you take a test, your activity will be tracked and scored. Based on predefined success criteria such as the amount of time taken or the number of errors, you will be given a score. This score is used to demonstrate how well you know the program based on the specific occupation you are interested in.

## 1,500+ ASSESSMENTS

Tests are designed for common programs used for the day-to-day operations of businesses. There are role-specific tests and non-skill-based assessments for various tools in different sectors:
